

GETTING STARTED WITH ENTRA ID PLAN 1

Entra ID (formerly Azure Active Directory) is a cloud identity and access management solution that safeguards your identities and network access. It allows organizations to adopt a Zero Trust security approach by verifying identities, validating access conditions, checking permissions, encrypting communication channels, and monitoring for breaches.

Daymark Entra ID Plan 1 provides best practices to improve your security posture and protect your identities. Our Entra ID consulting offerings will assist with your Entra ID migration, and includes a 2-hour introductory workshop for Entra ID Suite.

▼ ENTRA ID PLAN 1

OVERVIEW

Microsoft Entra ID Plan 1 offers a range of features designed to enhance identity and access management for organizations. Key features included in this plan are Conditional Access, Role-Based Access Control (RBAC), Advanced Group Management, Cross-Tenant User Synchronization, Global Password Protection and Management, Self-Service Group Management, and Hybrid Identity Support.

PLAN FEATURES

- Evaluate current conditional access policies and provide recommendations
- Migrate tenant to new authentication methods policies
 - Microsoft will require this to be completed by September 30, 2025
 - Provide guidance on disabling SMS messaging for MFA
- Configure MFA for all users with conditional access policies
- Configure strong MFA for Admin accounts
- Protect MFA registrations

▼ INTRODUCTORY WORKSHOP FOR ENTRA ID SUITE

Daymark's Entra ID Suite Introductory Workshop combines security best practices and our expertise to ensure secure access for your employees to apps and resources in any cloud or on-premises. This 2-hour introductory workshop details how Entra ID can help your organization maximize security, covering:

- Introduction to the Entra ID Suite
- Entra Internet Access
- Entra Private Access
- Entitlement Management

▼ GETTING STARTED

With deadlines looming, now is the time to modernize and protect your identities and increase your overall security posture in Microsoft 365.
